

Contents:

1. Introduction

- a. Document's organization
- b. Work's motivation
- c. Previous researches

2. ART, SOFM and Adaptive Heuristic Critic

- a. Neural networks used in classification task
- b. Single layer SOFM
- c. Multilayer extension of SOFM
- d. Adaptive Heuristic Critic

3. Hardware

- a. FPGA
- b. Video camera
- c. Other peripherals

4. Implementation

- a. Design flow for FPGA based projects
- b. Interfaces with peripherals
- c. Implementation of neural network's first layer
- d. Implementation principles for second layer
- e. Implementation principles for control sections and AHC

5. Obtained results

6. Feature developments

7. Conclusions
